Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I: The species of a patch bag as shown in claim 19 (the seal is through the bag and not through the patch).

Group II: The species of a patch bag as shown in claim 20 (the seal is through the bag and through the patch) (no drawings).

Group III: The species of a patch bag as shown in claims 21 and 22 (the patch overhangs both side edges of the bag and the seal is through the bag and through the patch) (no drawings).

Group IV: The species of a patch bag as shown in claims 21 and 23 (the patches overhanging both side edges of the bag and the overhanging portions of each of the patches being adhered to one another) (no drawings).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of claims are generic.

Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement otherwise the reply is considered improper.** An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3728

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
